WORK EXPERIENCE

Frontend Engineer

Vade – Full remote

Mar. 2023 - Present

- Participating to building up the design system of the company as the main developer of the project based on the Figma prototypes provided by the UX/UI team.
- Developing the components of the design system using Vue 3, Tailwind, Typescript, and Storybook.
- Documenting each component in Supernova to ensure seamless integration and future scalability of the system.

Frontend Engineer

Leavy – Paris, France

Dec. 2021 - Mar. 2023

- Designing and coding the internal admin service to manage the registered users, accommodation listings and the payouts schedule using Figma, Vue & TypeScript
- Developing the user webapp, closely following the Figma prototypes provided by the UX/UI team, to manage the user signup flow, accommodation descriptions and reservations using Vue.js and TypeScript

- Collaborating closely with the backend team to integrate the backend API
- Designing and building up the email templates (for registration, forgot password, bookings...) using Mailjet and integrating them to the app flow on different events

Full-stack Developer & Graphic Designer (internship)

Sept. 2020 - Nov. 2021

OSP – Neuilly-sur-Seine, France

- Developing the domiciliation website of the company, for submitting and generating online contracts using Laravel Vue & MySQL.
- Creating an internal admin dashboard to upload the scans of the client's mails and to send alerts when they receive packages using Laravel Vue & MySQL
- Designing the brand identity and the logo of Ospdom using Illustrator InDesign & After Effects
